Bergenia cordifolia

Short Description

Clump forming evergreen perennial, known for its hardiness and vigor. Flowers in spring. Full sun or semi shade. 30-40cm.

Cultivation Advice

Spot plant singularly or plant as a border at about 40-50cm apart. Remove old discolored leaves as required.

Plants raised in the sun are tolerant of heat and high light intensity. Plants raised in the shade and transplanted to full sun will likely damage but should eventually settle in.
